

## AO Airplane Shoulder Abduction System

Suggested PDAC L3690

### Features & Benefits

- Designed to maximize comfort and function.
- Adjustable lightweight durable frame fits all shapes and sizes.
- Provides comfortable abduction positioning while allowing for fine adjustments of internal and external rotation.
- Ranges from 20 degrees internal rotation to 45 degrees external rotation and neutral to 75 degrees of abduction.
- Multi-functionality and universal sizing reduces inventory by replacing several single function braces.
- One hand buckle for easier application

### Indications

Designed for rotator cuff repair, bankart repair, glenohumeral dislocations/subluxation, soft tissue repair, posterior shoulder repair, shoulder dislocations, injuries or instabilities.
